

Documentation

Sunday, December 2, 2018 11:59 PM

1) Purpose of document

This paper was written with the purpose of documenting my Personal Website/Portfolio Project to be turned in as my Final Competency Demonstration for CIS241 Fall Quarter 2018

2) Description of the project

The project's function is to fulfill my Personal Website/Portfolio Project, consisting of 5 simple HTML pages and 1 CSS style sheet.

3) Front-End Functionality

a. Features

The Web Page is accessible from most browsers and the user can easily navigate between each page and to the top of each page as necessary. There is also a guest-book to collect visitor information.

b. Sitemap & File Structure

See attachments

c. Description of Pages

- 1)home.htm - Home page welcoming visitors
- 2)interests.htm - Personal Interest page linking to 4 external sites
- 3)resume.htm - Personal Resume
- 4)reflections.htm - Personal Reflections from Fall 2018
- 5)guestbook.htm - Web Form for collecting visitor data powered by FormMail
- 6)myStyle.css - Cascading Style Sheet linked to all site pages

d. Wireframes

See attachment

e. Misc.

There is a hover effect to aid in navigation on all navigation bars. The links to external sites open in a new browser window.

4) Back-end Functionality

When a visitor enters their data in the Guest-Book, the data is sent to my e-mail account.

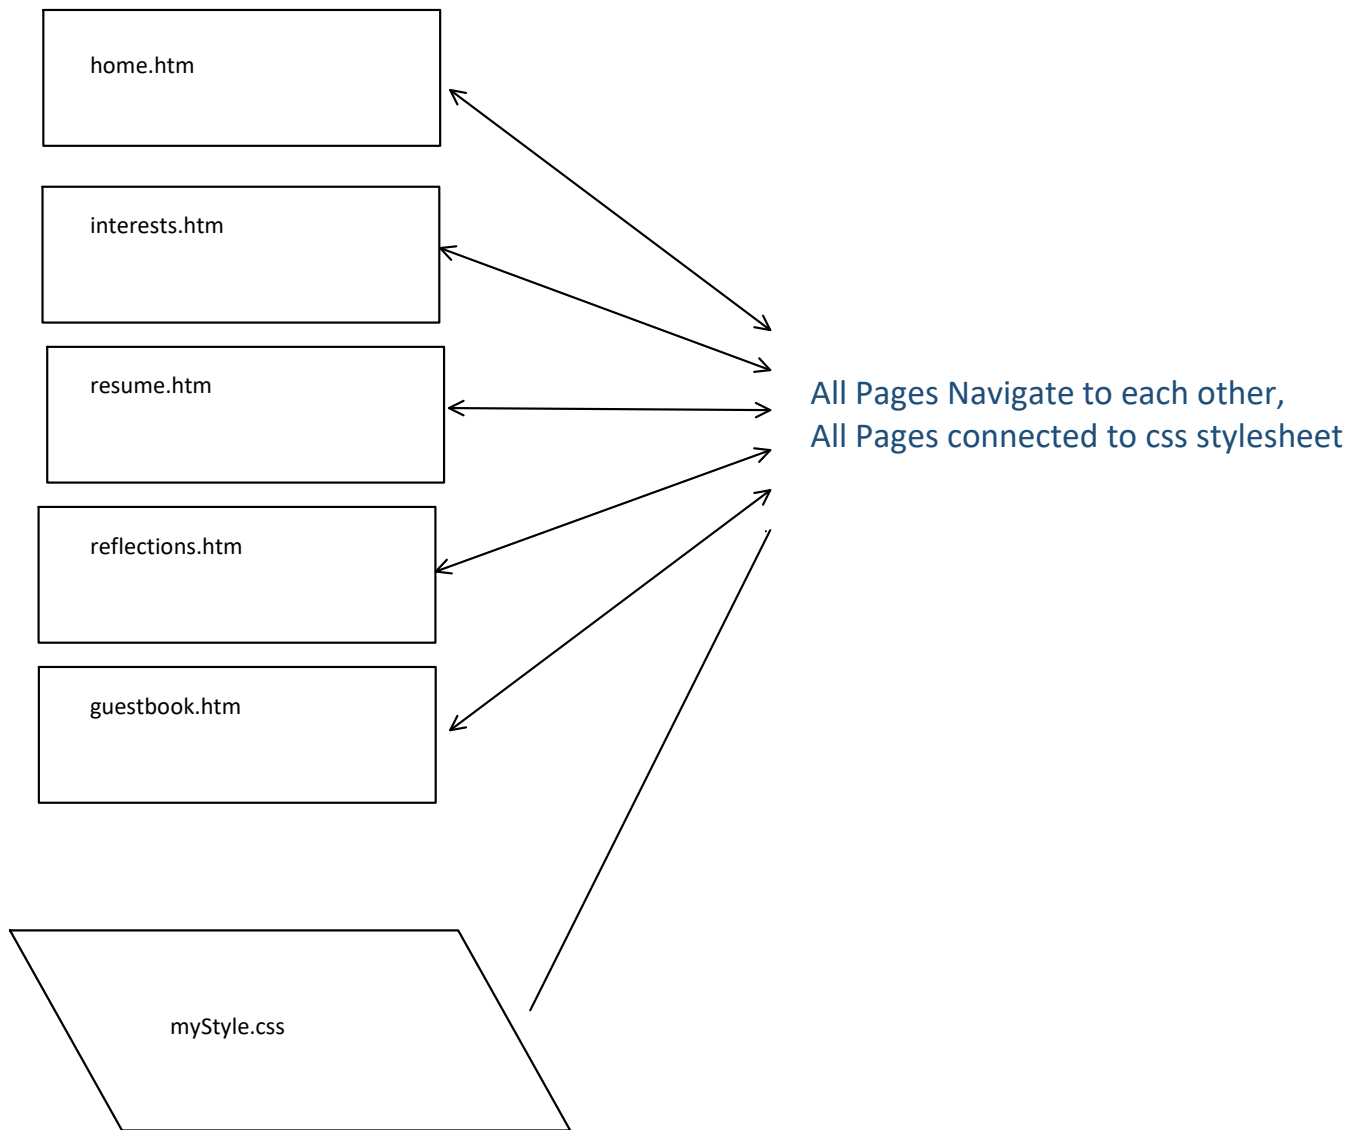

5) Conclusion

For my first website, I am very pleased with this project. I was very nervous to start, but once I did I could not stop working on it. I believe the project I am turning in fulfills all the required criteria. This project was a lot of fun.
